

Newcastle City Council Social Care User Experience Survey 2018/19

Caroline Siddle

Methodology

Background

- Statutory national survey for 2018/19
- Views of service users in England and Wales about local authority care and support services.
- Purpose of the survey is to provide **assured, benchmarked local data on outcomes** to support local services to think about:
 - Do specific groups of service users experience better outcomes?
 - Are services meeting all outcome needs?
 - Are social services adding value to people's lives?

Who is in the survey?

How many people?

- **4,113** adults receiving care and support services from Newcastle City Council between 1 September – 31 December 2018
- **1,293** service users in the sample (stratified random sample method)
- **February to April 2018** – questionnaires posted
- **407** returned questionnaires
- **31.5%** response rate
- Results representative to within **4.9 percentage points** either way

About the people in the survey

- **95%** white ethnic background
- **79%** Christian
- **61%** getting care in a community setting
- **43%** having services delivered via LA-commissioned personal budget
- **60%** aged 65 and over
- **57%** female
- **43%** receiving services due to need for physical support

In line with characteristics of all in sample & population

Indicators and comparisons

ASCOF 1A: Social care related quality of life

Combination of scores from questions about different aspects of people's lives:

- adequate or timely food and drink
- personal care
- safety
- social contact
- how they are helped
- control over daily life
- how they spend their time

2018/19 score = 19.2

Maximum possible: **24.0**

We have achieved 80% of maximum possible

2017/18 = **19.2**

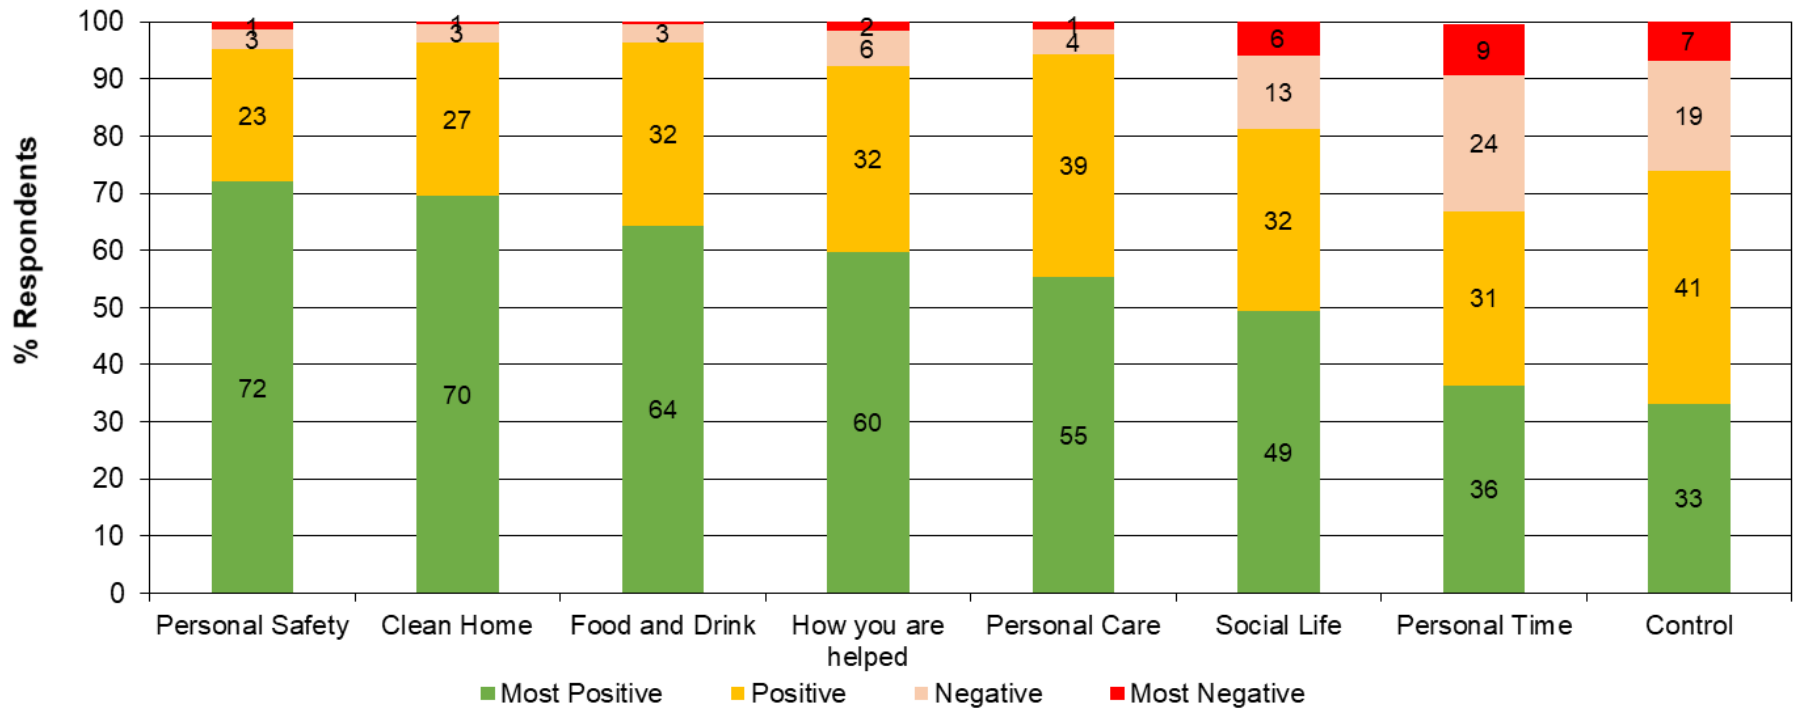

2016/17 = **19.4**

2015/16 = **19.7**

2014/15 = **19.2**

2014/15 to 2018/19: ASCOF Indicators 1B - 4B

Satisfaction and Information

Satisfaction, and how care and support makes people feel

Information and Advice

- **78%** would talk to a family member in the first instance if they felt unsafe or worried
- **61%** said they knew how to make a **complaint** and felt they could if they wanted to. (72% in 2017/18)
 - **9%** said they **did not know how** to make a complaint, but felt they **could find out** if they wanted to (12% in 2017/18)
- Most people said they would prefer to **find out information** about care and support services either by letter (52%), a leaflet (43%) or face-to-face/ meeting someone (42%).
- **47%** would complain by telephone.

About Social Care Users' Lives

What people can do

- People were asked whether they could:
 - feed themselves
 - get in and out of bed
 - get around indoors without help
 - wash their hands and face
 - use the toilet
- In each case, over two thirds said that they could do this
 - This does not mean that the majority of people in the survey can do **all** of these activities without help.
 - For example, some can wash their face and hands, but cannot get around indoors without help.
- 57% say their home either meets their needs very well, or meets most of their needs.

What people find difficult

- **71%** either found it difficult to get to all the **places in their local area** that they wanted to, could not get to all the local places they wanted to, or did not leave their homes.
- **65%** either cannot **wash** all over by themselves or find it difficult.
- **11%** had someone else answer on their behalf without asking them the questions

Health

- **63%** of respondents reported moderate or extreme **pain** or discomfort.
- **50%** reported moderate or extreme **depression** or anxiety.
- Only **38%** of people in the survey described their **health** as good or very good.
- Another **41%** said it was “fair”.

Extra help

- **87%** had someone else help them to **complete the questionnaire**. The most common form of help was reading the questions out (**43%**).
- **64%** of respondents did not **pay**, or have their family pay, for any **extra help**.
- **41%** of people in the survey were getting **practical (unpaid) help** from someone living inside their household, **53%** from outside their household.

What people told us

We asked people if they had any other comments they would like to make. The main themes in their comments were:

- “I am happy with care services and staff”
(34 people said this)
- “I am happy with my care home”
(4 people)
- “I would like to go out of my house more”
(4 people)

Others commented on things they would like to see improved.

“The difficulty is knowing who is coming and at what times (they can vary by 1½ hours) the carers are not given our precise location & have to ring for directions each time someone new comes despite office being given detailed directions.”

What Next?

- Similar findings to previous years, despite changes in sampling.
- Generally **positive** results, though some less positive (getting around outside the home, managing finances).
- Very **rich data** from survey available, which is representative of all service users.
- **Consider** how findings can be explored further to help understand service users' needs and views.

Appendix: Equalities and Safeguarding

Helping people take part

- Everyone was sent a 14 point font size questionnaire
- Large print provided
- Offer other formats:
 - British Sign Language
 - Telephone interview
 - Interview in person
 - Other languages

Safety and confidentiality

- The survey is confidential.
- Only researcher knows who has been sent a questionnaire and who replied
- Participants are not identified in the report
- Any comments / responses giving rise to concern for safety or wellbeing are referred to the Social Care Direct Team Manager

RGF – Reminder

- A quick reminder that all proposed research projects involving Wellbeing, Care and Learning service users or carers need to go through the Research Governance Framework (RGF).
- This ensures that:
 - Research is **ethically sound**, with minimal risk to the researcher or the participants
 - Research meets necessary **quality** standards
- The Newcastle RGF Lead Officer is Suzie Cooper:
suzie.cooper@newcastle.gov.uk
- If you know of anyone (student, member of staff, academic) proposing to conduct such research, they should be referred to Suzie Cooper before the research begins.
