

What the information means

The following is a list of the information included in the list and what it means:

Unique asset identity

The unique asset identity refers to the individual asset as either a land or building/block or lease reference. There is at least one entry per asset or user/owner (e.g. on one site there could be several buildings or in one building there could be several users/floors/rooms). This identifier is the original reference number from the asset register.

Property name and address

Details of the property name and address. This dataset includes Ordnance Survey derived data.

Easting (Ordnance Survey National Grid)

Northing (Ordnance Survey National Grid)

Tenure type

The tenure determines whether the local authority owns the freehold or a lease for the asset.

Tenure detail

The tenure is divided into further categories which refer to tenure or occupancy.

Holding type

The holding type determines whether the asset is:

- land only without permanent buildings (land)
- land with a permanent building (land/|building)
- building only (building)
